1 Manuscript Submission

The abstract and introduction need to say **What scientific/policy question(s)** the paper addresses, **Why the topic is of interest**, and **How the data analyses will address these questions**, in as non-technical a manner as possible.

References should be in the name/year format (e.g., Smith, Jones, and Roberts (1992)), using et al. for more than three authors; subsequent references can be abbreviated (e.g., Smith et al. (1992)).

We encourage use of the IMS LaTeX template when preparing your manuscript. The default setting is for numbered citations and references. To get the name-year format, change the line

- `RequirePackage[numbers]{natbib}` to
- `RequirePackage{natbib}`,

i.e., delete `[numbers]`.

Authors may use British or American spelling, as they prefer.
