Power Forecasting and Control discussion notes

Waleed Alhaddad

11/07/2019

Attendees:

- Raul

1 Notes and To-do

- Focus on the new Uruguayan data set to provide a complete picture of the project.

- Compare forecasts of two different companies.

- Compare the following models using AIC and BIC criteria:

    - M2: with the term $p_t(1 - p_t)$
    - M1: without the term $p_t(1 - p_t)$
    - M0: without the term $\frac{dp}{dt}$

- Add literature review to the paper.

- Start on rewriting the paper with Ahmed before my visit to him on June 22nd.
